# MATERNAL & INFANT HEALTH POLICY BRIEFING

The 5 leading causes of infant mortality in the United States:

1. Birth Defects
2. Preterm Births
3. Sudden Infant Death Syndrome
4. Maternal Pregnancy Complications
5. Injuries (e.g. suffocation)

Centers for Disease Control and Prevention (2015)

# BE A PART OF THE CHANGE

Thank you for your interest in the 2022 Healthy Mothers, Healthy Babies Coalition of Georgia (HMHBGA) Virtual Maternal and Infant Health Policy Briefing. Since 1974, HMHBGA has been one of the strongest statewide voices for improved access to healthcare and health outcomes for Georgia's mothers and babies.

During these unprecedented times, understanding the state of maternal and infant health in our State so that we can improve the health and well-being of our moms and babies is more important than ever. Attendees will explore maternal and infant health data to deepen their understanding and learn about policy priorities that, if adopted, would be pivotal in increasing health outcomes for moms and babies in our State. We will also hear from State policymakers about what they plan to tackle in the year ahead and how these issues may impact Georgia's families.

Lastly, we will have a brief awards ceremony to honor State lawmakers committed to improving maternal and infant health through policy change.

We hope you'll join our community of advocates and changemakers!

Becoming a corporate sponsor shows a vested interest in HMHBGA and our mission. As a corporate sponsor, your company is doing more than establishing or strengthening its connection to our network, but you're also joining a community of professionals, caregivers, and partners dedicated to making a difference.
